LeetCode

Education

Vellore Institute of Technology, Bhopal
B.Tech in Computer Science & Engineering

Jul 2026
CGPA: 8.44 / 10

Technical Skills

Languages: C++, Java, Python

Frontend: React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Responsive Design

State Management: React Hooks, Context API

Backend Basics: Node.js, Express.js, REST APIs

Database: MySQL, MongoDB

Tools: Git, GitHub, AWS EC2, Postman

Core Subjects: Object-Oriented Programming (OOP), Data Structures and Algorithms (DSA), Operating Systems (OS), Database Management Systems (DBMS), Computer Networks (CN)

Projects

Agricultural Yield Prediction Model | *Python, Decision Tree Regressor, Flask, REST API, AWS, MongoDB*

- Trained a Decision Tree Regressor on **5,000+ records** using features like rainfall, temperature, pesticide usage, and location.
- Achieved 85% prediction accuracy on crop yield forecasts.
- Built a Flask-based RESTful API to serve the model.
- Utilized MongoDB for data storage handled **10,000+ requests per day** with average latency under 100ms (simulated/tested locally).
data preprocessing and feature engineering (handling missing values, normalization), improving model stability and prediction consistency.

TaskFlow Manager | *React.js, Tailwind CSS, JavaScript*

- Designed a role-based task management web application supporting **50+ tasks per session**.
- Implemented localStorage-based persistence to maintain 100% client-side data retention across page reloads and sessions.
- Engineered a fully responsive UI ensuring cross-device compatibility across mobile, tablet, and desktop platforms.
- Optimized rendering performance using conditional rendering and efficient state management.
- Created 15+ modular React components and utilized React Hooks (useState, useEffect) for scalable state management.

VoiceNews AI | *React.js, Alan AI, JavaScript, REST APIs*

- Engineered an **AI-powered voice-controlled news application** enabling hands-free content navigation.
- Integrated third-party news APIs using async/await and implemented structured error handling mechanisms.
- Enhanced user experience by integrating loading states and improving UI responsiveness.
- Improved accessibility using semantic HTML.
- Designed **12+ reusable React components** and managed application flow using **React Hooks** for seamless UI interactions.
- Architected dynamic news rendering and voice-driven workflows, reducing manual interaction by 60%.

Certifications / Achievements

MERN Internship Program Certification [\[Link\]](#)

AWS Cloud Certification [\[Link\]](#)

HackerRank 5-Star in C++ (Problem Solving Badge)

Solved 290+ Data Structures and Algorithms problems on LeetCode and GeeksforGeeks platforms.

Participated in workshops on Cloud Computing and emerging technologies.

Additional Information

E-Cell Club (Event Management Team)

Event Management

- Managed 10+ events including E-Summit (2024), Parichay (2024), generating a profit of 80,000 with 1,000+ attendees. Planned and executed crowd management and vendor coordination strategies
- Implemented optimized solutions in Java/Python for competitive coding challenges focusing on DSA and time-complexity constraints.

Cricket Team Captain, Advitya 2025 College Fest

Team Captain

- Led the college cricket team during Advitya 2025 Fest; coordinated practice sessions, built team discipline, and improved on-field performance through strategic planning and teamwork.
